Subject: Thoughts on MS settlement

Dear sir or madam:

I am a U.S. Citizen, a long-time computer user and am appalled by the Department of Justice's proposal to give Microsoft a monopoly in education by allowing them to donate Windows-based computers, the bane of computing, to poorly-funded schools in the country. This proposal is a shame and travesty of justice. Microsoft has acted illegally time and again, thus, it clearly is not just nor in the public's best interest to reward their illegal and predatory behavior with such a largess. While I am not an Apple Computer stock holder, I favor the counter proposal submitted to the Department of Justice by Apple's CEO Mr. Steven Jobs.

Sincerely,

Stefan Ingannamorte
